

TEJASWINI H L

Full Stack Developer | React.js • Node.js • Express.js • JavaScript
Bengaluru, India • +91 9741695258 • tejaswinihl18@gmail.com • linkedin.com/in/tejaswini-hl

PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience building scalable, high-availability web applications using React.js, Node.js, Express.js, and SQL. Expert in Micro Frontend (MFE) architecture, RESTful API design, Docker containerization, and CI/CD pipelines. Delivered enterprise-grade platforms processing millions of transactions monthly with 99.9% uptime. Proven ability to mentor junior developers and own complete feature lifecycle from design to production.

TECHNICAL SKILLS

Frontend: React.js, Redux, React Hooks (useState, useEffect, useContext, useReducer), Micro Frontend (MFE) Architecture, JavaScript (ES6+), HTML5, CSS3, Responsive UI

Backend: Node.js, Express.js, RESTful API Design & Development

Databases: SQL, Relational Database Design, Query Optimization, Audit Logging, Transaction Management

DevOps & Tools: Docker, CI/CD Pipelines, Git, Linux Server Management, Xshell

API & Testing: Swagger (OpenAPI), Postman, API Validation & Debugging

Soft Skills: Team Leadership, Cross-functional Collaboration, Mentoring, Production Issue Resolution

WORK EXPERIENCE

Full Stack Developer — 6D Technologies

Apr 2022 – Present | Bengaluru, India

Building and maintaining enterprise web platforms for 11+ international clients.

- Architected a Micro Frontend (MFE) system using React.js supporting 5+ applications — increased code reuse by 40% and cut feature delivery time by 25%.
- Designed and delivered 30+ RESTful APIs using Node.js & Express.js, supporting 10+ business workflows and multiple third-party integrations.
- Containerized applications with Docker and built CI/CD pipelines, cutting deployment time by 50% with consistent releases across dev, staging, and production.
- Optimized SQL databases handling 100K+ daily transactions, improving query performance by 30% through indexing and query tuning.
- Established audit logging capturing 100% of critical system events, reducing incident investigation time by 35%.
- Resolved 20+ production bugs and 15+ critical incidents; prevented 10+ potential failures through proactive log analysis, lowering repeat incidents by 30%.
- Mentored 4–5 junior developers through code reviews, debugging sessions, and onboarding, improving team velocity and delivery quality.
- Delivered 5+ features end-to-end — from requirements and design through coding, testing, deployment, and production support — with full ownership.

KEY PROJECTS — INTERNATIONAL TELECOM OPERATORS

USSD Platform & Shortcode Engine

Ooredoo (Qatar) • Etisalat (UAE) • Zain (Sudan)

Stack: React.js • Node.js • Express.js • SQL • Docker • CI/CD

- Built end-to-end USSD shortcode management system handling menu flows, session routing, and real-time transaction processing for millions of users across Qatar, UAE, and Sudan.
- Developed React.js frontend for operator configuration UI and Node.js/Express.js backend APIs supporting dynamic USSD menu creation and shortcode assignment workflows.

USSD Messaging & CVM Platform

CVM Almadar (Libya) • CVM Mattel (Afghanistan)

Stack: React.js • MFE Architecture • Node.js • SQL • REST APIs

- Developed Customer Value Management (CVM) modules enabling targeted USSD messaging campaigns, subscriber segmentation, and promotional shortcode workflows for telecom operators.
- Implemented MFE architecture to support independent deployment of CVM modules across multiple operator environments without system downtime.

USSD & Mobile Money Integration

Safaricom (Kenya) • MTN Ghana • Tigo (Tanzania)

Stack: Node.js • Express.js • SQL • REST APIs • Swagger • Docker

- ▶ Delivered USSD-based mobile money and subscriber services for high-traffic African operators, integrating third-party payment and messaging APIs with carrier-grade reliability at 99.9% uptime.
- ▶ Optimised SQL queries for 100K+ daily transactions across multi-operator databases; built Swagger-documented APIs used by QA and client integration teams.

USSD Service Platform — Multi-operator Rollout *Econet (Zimbabwe) • Netone (Zimbabwe) • Somtel (Somaliland)*

Stack: [React.js](#) · [Node.js](#) · [Docker](#) · [CI/CD](#) · [Linux](#) · [Git](#)

- ▶ Led full-stack feature delivery for three simultaneous operator onboardings — managing requirements, design, development, testing, and production deployment independently.
- ▶ Automated deployments using Docker containers and CI/CD pipelines, ensuring consistent and stable releases across dev, staging, and production environments.

EDUCATION

Bachelor of Engineering – Information Science & Engineering

Graduated: June 2022

Channabasaveshwara Institute of Technology, Gubbi • **CGPA: 8.4 / 10**
